DATE

NAME

PHYSICIAN SERVICE

DATE

REASON FOR CONSULTATION:

11/3/75

CONSULTANT'S FINDINGS: (HISTORY AND PHYSICAL)

FICU note

19 yr old ♀ underwent cholecyst @ interval caudal
anesthesia just proximal to the bifurcated - ad cholecyst
a 2nd caudal anesthetic at the supracoastal point.
Pt was well until 10/15/75 when she was
brought to the nursing & was unresponsive 1 day later
the then patient but cerebral of poor hemodynamics
& stupor. Several days later CP revealed
bilateral chronic ad angiogram demonstrated
aneurysm PC: papilloedema

OPINION AND RECOMMENDATIONS:

(a) s/p aneurysm repairs on
@ interval caudal
(b) Pt - observed & critical
7 by - attend to neurology status
